# THE PAYMENT PLATFORM THAT MAKES GETTING PAID EASY.

## Simple, frictionless payment processing

YNCU merchant services help businesses accept credit and debit cards online, in-stores and on mobile devices.

We simplify payments and facilitate frictionless payment processing for you and your customers.

Instead of piecing together several services from multiple vendors, you only need one account to process any type of payment, access data, and give your customers the convenience of paying however they want.

## Seven Ways to Get Paid

With Payfirma's seven different payment channels, getting paid has never been easier.

### Mobile Payments

Accept payments on the go with a card reader or simply process payments on our mobile app.

### Traditional Terminals

Speed up your checkout lines by accepting Tap and Pay (NFC), Chip and PIN (EMV), and debit card payments.

### Invoicing

Email your customers electronic invoices that link to a secure payment page.

### Web Terminal

Store and charge credit cards using any computer browser.

### eCommerce

Accept payments on your website with a connection to a secure online gateway.

### Recurring Billing

Subscribe customers to payment plans and billing schedules to automate recurring payments.

### API Integration

Seamlessly integrate payments technology with your existing software.

## GET PAID. GET INSIGHT. GET GROWING.

Clients who accept payments with more than one channel grow faster than those who only use one. We make sure you have all the payment tools you could ever need, at preferred pricing rates exclusive to YNCU business banking clients.

## Ready. Set. Grow!
